1 - IDENTIFICATION OF THE SUBSTANCE/MIXTURE AND OF THE COMPANY/UNDERTAKING

1-1 Product identifier

Product Name: VeryOne® Lubricity Improver 041
Product code: VO-LI-041
Product type: Blend

1-2 Relevant identified uses of the substance or mixture and uses advised against

Identified uses: Fuel additive.
Uses advised against: No data available.

1-3 Details of the supplier of the safety data sheet

VeryOne - SORGUES site:
1928, avenue d'Avignon
CS 90109 SORGUES
84275 VEDENE CEDEX

Tel: + 33(0)4.90.33.62.00 (8am-7pm, GMT+1)
Fax: + 33(0)4.90.39.52.64
E-mail: fds@veryone.com

1-4 Emergency Telephone Number

U.S: 911
VeryOne: +33.(0)4.90.33.62.00 (8am-7pm, GMT+1)

2 - HAZARDS IDENTIFICATION

2-1 Classification of the substance or mixture

OSHA/HCS status
This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFP 1910.1200).

Classification of the substance or mixture
FLAMMABLE LIQUIDS – Category 4
ASPIRATION HAZARD – Category 1
SPECIFIC TARGET ORGAN TOXICITY (central nervous system) – Category 3
CARCINOGENICITY – Category 2
2-2 Label elements

Labelling

Hazard pictograms:

Signal word: Danger
Product identifiers:
Hazard Statements:
- H227 - Combustible liquid
- H304 - May be fatal if swallowed and enters airways.
- H336 - May cause drowsiness or dizziness
- H351 - Suspected of causing cancer.

Supplemental Hazard information (EU):

Precautionary Statements – General:

Precautionary Statements – Prevention:
- P201 - Obtain special instructions before use.
- P271 - Use only outdoors or in a well-ventilated area.

Precautionary Statements – Response:
- P301+P310 - IF SWALLOWED: Immediately call a POISON CENTER/doctor
- P331 - Do NOT induce vomiting.

Precautionary Statements – Storage:
- P405 - Store locked up.

Precautionary Statements – Disposal:
- P501 - Dispose of contents and container in accordance with local regulations.

2-3 Other hazards

Not available

3 - COMPOSITION/INFORMATION ON INGREDIENTS

3-1 Substances

Not applicable.

3-2 Mixtures

<table>
<thead>
<tr>
<th>Substance</th>
<th>C (%)</th>
<th>Classification</th>

</thead>
<tbody>
<tr>
<td>Hydrocarbons, C10, aromatics, &gt;1% naphthalene</td>
<td>10-100</td>
<td>H227: Combustible liquid H304: May be fatal if swallowed and enters airways. H336: May cause drowsiness or dizziness H351: Suspected of causing cancer.</td>
<td>See section 8.1</td>
</tr>
</tbody>
</table>

The mixture does not contain any substances classified as Substances of Very High Concern (SVHC) by the European Chemicals Agency (ECHA) under article 57 of REACH: http://echa.europa.eu/fr/candidate-list-table.
3-3 Remark

Text phrases and H-: see section 16.

4 - FIRST AID MEASURES

4-1 Description of first aid measures

General information:
When in doubt or if symptoms are observed, get medical advice. In case of accident or unwellness, seek medical advice immediately (show directions for use or safety data sheet if possible). Do not leave affected person unattended. Keep affected person warm, still and covered.

Following inhalation
Provide fresh air. Remove person to fresh air and keep comfortable for breathing. No resuscitation mouth-to-mouth or mouth-to-nose. Ambu use a mask or respirator. If breathing is irregular or stopped, administer artificial respiration.

Following skin contact
Wash with soap and water. Change contaminated, saturated clothing.

Following eye contact
In case of eye irritation consult an ophthalmologist. Rinse immediately carefully and thoroughly with eye-bath or water.

Following ingestion
IF SWALLOWED: Rinse mouth. Do NOT induce vomiting. Never give anything by mouth to an unconscious person or a person with cramps.

4-2 Most important symptoms and effects, both acute and delayed

The most important known symptoms and effects are described in the labelling (see section 2-2) and/or in section 11.

4-3 Indication of any immediate medical attention and special treatment needed

Notes for the doctor:
Treat symptomatically.

5 - FIREFIGHTING MEASURES

5-1 Extinguishing media

Suitable extinguishing media:

Unsuitable extinguishing media:
Strong water jet.
5-2 Special hazards arising from the substance or mixture

Formation of toxic gases is possible during heating or in case of fire.

5-3 Advice for firefighters

Wear a self-contained breathing apparatus and chemical protective clothing.

5-4 Additional information

Do not inhale vapors and fumes. Co-ordinate fire-fighting measures to the fire surroundings. Move undamaged containers from immediate hazard area if it can be done safely. Use caution when applying carbon dioxide in confined spaces. carbon dioxide can displace oxygen. Use water spray jet to protect personnel and to cool endangered containers. Collect contaminated fire extinguishing water separately. Do not allow entering drains or surface water.

6 - ACCIDENTAL RELEASE MEASURES

6-1 Personal precautions, protective equipment and emergency procedures

No special measures are necessary. Use personal protection equipment. Remove persons to safety. Use appropriate respiratory protection. Provide adequate ventilation.

6-2 Environmental precautions

Ensure that waste is collected and contained. Avoid release to the environment. Do not allow to enter into soil/subsoil. Do not allow to enter into surface water or drains. Retain contaminated washing water and dispose it.

6-3 Methods and material for containment and cleaning up

Treat the recovered material as prescribed in the section on waste disposal. Collect in closed and suitable containers for disposal. Absorb with liquid-binding material (e.g. sand, diatomaceous earth, acid- or universal binding agents). Wipe up with absorbent material (e.g. cloth, fleece). Clean contaminated objects and areas thoroughly observing environmental regulations. Ventilate affected area.

6-4 Reference to other sections

Safe handling: see section 7.
Disposal: see section 13.
Personal protection equipment: see section 8.

6-5 Additional information

Not available.
7 - HANDLING AND STORAGE

7-1 Precautions for safe handling

Avoid exposure - obtain special instructions before use. Use only outdoors or in a well-ventilated area. Fixed storage containers, transfer containers and associated equipment should be earthed and bonded to prevent accumulation of static charge.

Protective measures:
Avoid contact with skin, eyes and clothes. Avoid breathing gas/fumes/vapour/spray.
Avoid open flames and high energy ignition sources.
Provide adequate ventilation as well as local exhaustion at critical locations, or the use of adequate respiratory protection.
Only allow access to authorised staff.
Sewers and ducts must be protected against the entry of the product.

Advices on general occupational hygiene:
Wash hands before breaks and after work.
Remove contaminated, saturated clothing.
Work in well ventilated zones or use proper respiratory protection.

7-2 Conditions for safe storage, including any incompatibilities

Keep container tightly closed in a dry, cool, and well-ventilated place. Keep container in upright position in order to prevent leakage.

Requirements for storage rooms and vessels:
Store locked up.
Ensure adequate ventilation of the storage area.
Use isolated drainage to prevent discharge to soil.

Advice on joint storage
Keep away from (strong) acids and (strong) bases.
Keep away from food, drink and animal feedingstuffs.

7-3 Specific end uses

Apart from the uses mentioned in section 1.2 no other specific uses are stipulated.

8 - EXPOSURE CONTROLS/PERSONAL PROTECTION

8-1 Control parameters

EXPOSURE LIMIT VALUES
Exposure limits/standards:

<table>
<thead>
<tr>

<td>Skin</td>
</tr>
</tbody>
</table>

**Note:** Information about recommended monitoring procedures can be obtained from the relevant agency(ies)/institute(s): UK Health, Safety Executive (HSE), and INRS.

8-2 Exposure controls

Technical measures and the application of suitable work processes have priority over personal protection equipment (see section 7).

**Personal protection equipment**

**Eye/face protection:**
Eye protection suitable to chemical hazards.

**Skin protection:**
Hand protection: Wear suitable protective gloves.

**Recommendation:** Viton, minimum 0.71 mm thickness or comparable protective barrier material with a high performance level for continuous contact use conditions, permeation breakthrough minimum 480 minutes in accordance with CEN standards EN 420 and EN 374.

**Body protection:**
Wear suitable protective clothes.

**Recommendation:** chemical/oil resistant clothing.

**Respiratory protection:**
Respiratory protection necessary at: If technical exhaust or ventilation measures are not possible or insufficient, respiratory protection must be worn.

**Recommendation:** Half-face filter respirator Type A filter material. For high airborne concentrations, use an approved supplied-air respirator.

**Environmental exposure controls:**
Ensure that waste is collected and contained. Avoid release to the environment.

Do not allow to enter into soil/subsoil. Do not allow to enter into surface water or drains. Retain contaminated washing water and dispose it.
8-3 Additional information

Not available.

9 - PHYSICAL AND CHEMICAL PROPERTIES

9-1 Information on basic physical and chemical properties

Physical state: Liquid
Colour: Light to dark yellow
Odour: Aromatic
Odour threshold: No data available
pH: < 7
Melting point/freezing point: < - 6 °C
Initial boiling point and boiling range: > 180 °C
Flash point: > 65 °C (ASTM D-93)
Evaporation rate: 0.08 for the substance: Hydrocarbons, C10, aromatics, >1% naphthalene
Flammability: No data available
Upper/lower flammability or explosive limits: UEL: 7.0 LEL: 0.9 [Extrapolated for the substance: Hydrocarbons, C10, aromatics, >1% naphthalene]
Vapour pressure: 0.08 kPa at 20°C [Calculated for the substance: Hydrocarbons, C10, aromatics, >1% naphthalene]
Vapour density: 4.6 at 101 kPa for the substance: Hydrocarbons, C10, aromatics, >1% naphthalene
Relative density: ca. 0.9 (20 °C)
Solubility(ies): Water: < 0.005 g/100ml (25 °C)
Partition coefficient: n-octanol/water (Log KOC): < 4 [Estimated for the substance: Hydrocarbons, C10, aromatics, >1% naphthalene]
Auto-ignition temperature: > 300 °C
Decomposition temperature: No data available
Viscosity: < 15 mm².s⁻¹ (20 °C) et < 40 mm².s⁻¹ (0 °C)
Explosive properties: No data available
Oxidising properties: No data available

9-2 Other safety information

Not available.

10 - STABILITY AND REACTIVITY

10-1 Reactivity

See sub-sections below.
10-2 Chemical stability

Material is stable under normal conditions.

10-3 Possibility of hazardous reactions

No additional information available.

10-4 Conditions to avoid

Open flames and high energy ignition sources.

10-5 Incompatible materials

Strong oxidisers, strong acids and strong bases.

10-6 Hazardous decomposition products

Material does not decompose under normal conditions.

10-7 Additional information

Not available.

11 - TOXICOLOGICAL INFORMATION

No information available on the end product. The product is classified according to the calculation rules defined by the applicable regulations.

11-1 Substance information

Below the information of the substance “Hydrocarbons, C10, aromatics, >1% naphtalene”, present at a concentration of [10-100] % in this blend.

</tr>
</tbody>
</table>

### Additional information

For the substance (Hydrocarbons, C10, aromatics, >1% naphthalene) itself:

Vapour concentrations above recommended exposure levels are irritating to the eyes and the respiratory tract, may cause headaches and dizziness, are anaesthetic and may have other central nervous system effects. Prolonged and/or repeated skin contact with low viscosity materials may defat the skin resulting in possible irritation and dermatitis. Small amounts of liquid aspirated into the lungs during ingestion or from vomiting may cause chemical pneumonitis or pulmonary edema.

**Contains:**

NAPHTHALENE: Exposure to high concentrations of naphthalene may cause destruction of red blood cells, anemia, and cataracts. Naphthalene caused cancer in laboratory animal studies, but the relevance of these findings to humans is uncertain.
11-1-1 Information on the mixture

No information available on the product. All mentioned information relates to the substance “Hydrocarbons, C10, aromatics, >1% naphtalene”, present at a concentration of [10-100] % in this blend.

11-1-2 Information on likely routes of exposure

The routes of likely exposures under normal use of the product are by inhalation, skin and ingestion contact.

11-1-3 Symptoms related to the physical, chemical and toxicological characteristics

See section 4-2.

11-1-4 Delayed, immediate and chronic effects of short or long term exposure

See section 4-2.

11-1-5 Interaction effects

No data available.

11-1-5 Absence of specific data

No information available on the product. All mentioned information relates to the substance “Hydrocarbons, C10, aromatics, >1% naphtalene”, present at a concentration of [10-100] % in this blend.

12 - ECOLOGICAL INFORMATION

12-1 Toxicity

Data for mixture:
No information available on the product.

Substances:
The information below relates to the substance “Hydrocarbons, C10, aromatics, >1% naphtalene”, present at a concentration of [10-100] % in this blend.

Expected to be toxic to aquatic organisms. May cause long-term adverse effects in the aquatic environment.

<table>
<thead>
<tr>

Aquatic - Acute Toxicity | 96 hour(s) | Oncorhynchus mykiss | LL50 >=2<=5 mg/l: data for the material
---|---|---|---
Aquatic - Acute Toxicity | 72 hour(s) | Pseudokirchneriella subcapitata | NOELR 1 mg/l: data for the material
Aquatic - Acute Toxicity | 72 hour(s) | Pseudokirchneriella subcapitata | EL50 >=1<=3 mg/l: data for the material

12-2 Persistence and degradability

Data for mixture:
No information available on the product.

Substances:
The information below relates to the substance “Hydrocarbons, C10, aromatics, >1% naphthalene”, present at a concentration of [10-100] % in this blend.

Biodegradation:
Material - Expected to be inherently biodegradable

Hydrolysis:
Material - Transformation due to hydrolysis not expected to be significant.

Photolysis:
Material - Transformation due to photolysis not expected to be significant.

Atmospheric Oxidation:
Material - Expected to degrade rapidly in air

12-3 Bioaccumulative potential

The product has not been tested.

12-4 Mobility in soil

Data for mixture:
No information available on the product.

Substances:
The information below relates to the substance “Hydrocarbons, C10, aromatics, >1% naphthalene”, present at a concentration of [10-100] % in this blend.

Expected to partition to sediment and wastewater solids. Moderately volatile.

12-5 Results of PBT and vPvB assessment

This product is not, or does not contain, a substance that is a PBT or a vPvB.

12-6 Other adverse effects
No adverse effects are expected.

12-7 Additional ecotoxicological information

Data for mixture:  
No information available on the product.

Substances:  
The information below relates to the substance “Hydrocarbons, C10, aromatics, >1% naphthalene”, present at a concentration of [10-100] % in this blend.

13 - DISPOSAL CONSIDERATIONS

13-1 Waste treatment methods

Product/Packaging disposal  
Collect the waste separately.  
Dispose of waste according to applicable legislation.  
Handle contaminated packages in the same way as the substance itself.  
Non-contaminated packages must be recycled or disposed of.  
Contaminated packing must be either disposed of or completely emptied and can be reused after proper cleaning, according to applicable legislation.

13-2 Additional information

Not available.

16-5 Additional information

Not available.

The information given in this Safety Data Sheet is based on our present knowledge and on European and national regulations. This Safety Data Sheet describes safety requirements relative to identified uses, it doesn't guarantee all the product properties particularly in the case of non-identified uses. The product mustn't be used for any uses other than those identified under heading 1. Since the user's working conditions are not known by us, it is the responsibility of the user to take all necessary measures to comply with legal requirements for specific uses and avoid negative health effects.
